

TRINITY FARMS

THE NORTHWEST'S #1 SOURCE FOR SIMANGUS™ GENETICS!

100 Fall Bulls
75 Spring Bulls
50 Fancy Open Heifers
March 2, 2024 - Ellensburg, WA

GENERATIONS OF EXCELLENCE

Wow, what a year 2023 closed out to be for the cow calf man! We hope that each of you received the record prices that we heard about all fall – most everyone sold their calves for more money than at any other time in their lifetime. These are exciting times for sure and we all welcome the improvement in the bottom line as a result.

It's times like these to take every advantage possible to position yourself for tomorrow. In the beef business the only free lunch is heterosis and we provide that in spades with the offering here at Trinity Farms and it comes in a high-quality bull package that is as relevant and valuable as ever backed by a program, people and guarantee that is unparalleled in our part of the world. Take advantage of decades of effort to create bulls to make a meaningful impact for you in your program.

Be sure to evaluate your current bull battery and see what needs refining – old bulls have been worth a record premium for this past year and now is a fantastic time to be able to capture added value and trade up with some younger bulls and not have too much of a delta in doing so! If you have not been semen testing, we certainly encourage you to do so – in our experience, although this is a bit of a project, it is well worth it to know that you are starting out the season with bulls that are capable of settling cows.

Our reformatted catalog this year includes the results of the Right Choice technology in an effort to further facilitate your selection process while continuing to mitigate your risk, especially for those looking for heifer bulls. As always, we are looking for ways to deliver more value while making the selection process easier at the same time.

Customer service is what we are all about and we have many competitive initiatives that support this position! From our 3-year guarantee on feet, our exclusive Rancher Rebate program that has returned nearly \$300,000 to our customers, the new PDP – Payment Deferral Program, the new BDI - Bakers Dozen Incentive, delivery assistance, complete genetic testing and parentage on the entire cow herd including every bull that sells, educational and networking opportunities in conjunction with our fall sale, and bulls that are truly forage developed for their greatest long-term success.

Please be our guest for the weekend beginning with viewing of the sale cattle Friday March 1st, our fantastic steak BBQ dinner starting at 6 PM with our Texas Hold Em tournament to follow. Saturday allows for viewing of the cattle all morning with a great lunch served at 11:30 and the bull sale starting promptly at 1 PM.

From our family to yours – Welcome to Ellensburg and Trinity Farms.

2024 Schedule of Events

Friday

All Day: Pre-Sale Open House – view cattle and tour the ranch

6 PM: BBQ Steak Feed

Annual no buy in Texas Hold 'Em Tournament and events for the kids

Saturday

8 AM: Coffee and Donuts – view the cattle

ASA PUBLICATION, INC

One Genetics Way, Bozeman, MT 59718

Phone: 406-587-2778

www.simmental.org

Herd Health:

Ask any cattle buyer today and they will tell you that two of the most important factors when they are buying your cattle are genetics and health. Our cattle have been developed under our very extensive health protocol. All sale animals and the entire Trinity Farms breeding herd are properly vaccinated and boosted annually with Inforce 3 (2x in calves) Bovishield Gold 5 FP5 VL5 HB (3x in yearlings by sale time), Ultra Choice 8 (3x per year), One shot (pasturella), Multimin, Vitamin A&D, Pinkeye vaccine at branding, injectable de-wormer at branding, pour on de-wormer at weaning and Valbazen drench in the fall for internal parasites and liver flukes. All heifers are calfhood vaccinated for Brucellosis. Free choice salt and minerals are provided year round as required.

Breeding Soundness Exam:

Don Peter, DVM. All bulls will have passed a breeding soundness exam and will be declared satisfactory breeders. Scrotal circumferences will be available upon request. All females have been palpated and vet inspected.

Semen Interest:

Trinity Farms is reserving a 50% net revenue semen interest in every bull. You have full possession of the bull and retain all salvage value. This just provides Trinity Farms the right to 50% of the net revenue semen sales in the event that future semen sales on your bull become a possibility. As many bulls are being "discovered" later in life with the increasing use of AI in commercial settings, this allows for maximum opportunity for you as the buyer as well as Trinity Farms. You are free to collect the bull as you see fit and that is something that we certainly encourage on higher value bulls as a way to protect your investment. If the buyer is not interested in collecting or marketing semen from a bull, Trinity has the right to collect a semen bank on the bull at our cost and the buyer's convenience. This semen bank would be 100% owned by Trinity Farms for use in our program or marketing efforts. On those bulls where opportunity exists, we are excited to be able to continue our relationship with you in a marketing effort and will be glad to visit with you about those specifics when the time arises.

Performance Data:

All EPDs, birth weights, weaning weights, and ratios are official data processed with the ASA and AAA. This catalog contains ultrasound data and updated ultrasound EPDs. All EPDs are current as of Spring 2024.

Delivery:

We offer free delivery on any bull up to 300 miles to a central point and free delivery on 5 or more bulls up to 500 miles to a central point. All other deliveries are made at cost. We will make every attempt to deliver bulls directly to your ranch when we can. All cattle will be delivered at the buyer's risk. With our spring field work and AI programs starting in late March it makes **completing our deliveries by the end of March** necessary, your cooperation in this regard is greatly appreciated. For those of you making volume purchases, please contact Robb to arrange for special freight considerations.

Your bulls may be kept at Trinity Farms free of charge until March 20th 2024. Your bulls may be kept here until May 1st 2024 if needed, feed and care will be charged @ \$5.00/day. Although we will care for the bulls to the best of our ability, they are here at your own risk and we recommend that you insure your bulls to protect your investment. **Any bulls being fed at Trinity Farms past the delivery schedule will need to be picked up by the buyer.**

Heifer Delivery:

Please plan to bring your trailer or secure transportation with a friend or neighbor for your purchases. Although we will make every effort to assist you in any way possible, we typically do not provide delivery for female sales. For those of you planning on making volume purchases please visit with Robb or Chelse prior to the sale for potential freight considerations.

Insurance:

Insurance will be available sale day through James F. Bessler Inc. Livestock Mortality Insurance.

Announcements:

Announcements from the auction block regarding all cattle selling take precedence over printed material in the sale book or other printed material associated with this sale.

Liability:

Trinity Farms' representatives or any of the sale staff assume no liability, legal or otherwise for any accidents or injuries that may occur. Each animal will become the buyer's risk as soon as the animal is sold.

Terms and Conditions:

Terms of the sale shall be cash, bankable check, Visa or Mastercard to be settled on sale day unless prior arrangements have been made. We will be charging a 3% fee on all card charges. Cattle sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf) and the American Simmental Association.pdf).

Protect your Investment!

Exclusive 3 Year Guarantee on Feet and Semen

You simply cannot afford to buy a bull that the seller will not stand behind and guarantee!

And we offer the best guarantee in the business!

Any bull purchased through our annual bull sale will be guaranteed for up to 3 breeding seasons from date of sale against structural unsoundness due to foot shape or failure to pass a breeding soundness exam when completed by a licensed and experienced DVM.

Visit our website at www.trinityfarms.info to view the complete guarantee

Guarantee on Open Heifers

Every open heifer is guaranteed open at time of sale and guaranteed to be a satisfactory breeder provided that adequate animal husbandry and nutritional health has been provided.

"We stand behind all our cattle because it is the right thing to do"
~Mike Forman

"No Bull" Advice

Insure your bull against injury

Run younger bulls separate from older bulls

Test your bulls at least 40 days prior to turnout

Better yet, test before bull sale season in the event you need to replace any bulls

Protect your bulls from freeze damage by providing bedding during the cold winter months

GW Triple Crown 018C

GW Triple Crown 018C

With nearly 2000 progeny reported in the database, Triple Crown is a well proven outcross option that has worked quite well here at Trinity Farms as this stout and valuable sire group represents. He presents an enviable EPD tabulation as a unique birth to yearling "spread" bull and has sired a high-performance set of sons that are truly superior both physically and on paper. Bred with cattle end point in mind, he offers a respected carcass contribution and has sired a fantastic group of age advantaged bulls to lead off this year's event.

Compare with Ease

We are excited to offer a fantastic set of bulls again this year with nearly double the age advantaged fall bulls as last year! Our new catalog format allows for an improved way to evaluate the fall bulls vs. spring bulls and we have also added the Right Choice technology this year to further facilitate your selection process and risk protection. If you so desire, the bulls can be viewed in the ASA database for additional data at www.simmental.org, clicking on animal search and entering the registration number to access their record. All bulls have passed a semen test prior to the sale and are ready for service.

Musgrave 316 Colossal 137

Musgrave 316 Colossal 137

Colossal was added to our program as a heifer bull with unmatched body mass and middle rarely seen in popular Angus beef bulls today. As is evidenced by this large powerful sire group, he has complimented the cow herd here at Trinity Farms very well. Due to the overwhelming quality of his calf crop here, he has been bred to over 100 cows for the last 3 seasons. As impressive as this sire group is we are even more anxious to calve his first set of daughters at the ranch this fall. Built to be real beef bulls, this will be an extremely sought after sire group on sale day.

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and they have great EPDs to match!

Sitz Stellar 726D

Stellar has been used to introduce an outcross pedigree with improved foot structure into our program with fantastic results and has sired some of the highest selling bulls to ever sell at Trinity Farms in the last 2 years. Bred to be a maternal specialist from a program known for some of the best females in the Angus business for decades, these sons have the performance to add additional pay weight to a calf crop in a pleasing phenotype we are sure you will appreciate.

*We have found we can most often use these 3/8 bulls interchangeably with the 1/2 blood bulls

Does DNA Matter?

What is in a DNA test? Although our foray into DNA testing started in the mid-80s for confirmation of parentage in high impact individuals and testing for homozygosity for color and polled/horned traits, it has evolved far past that today. With the uproar that surrounded genetic defects that were quite prevalent in the Angus population a number of years ago, we then added another layer to our DNA testing profiles. Our recent experience with testing for genomic enhancement began with testing of a few select bulls each year that we thought could have stud bull potential.

In 2016 we decided to test ALL of our sale bulls in an effort to provide our customers not only the most up to date, genomic enhanced EPDs available, but even more importantly to provide another layer of risk management with the associated improved accuracies. Then in 2018 we submitted DNA on the entire cow herd and have continued to submit data on the entire calf crop each year since! Source your genetics here with confidence knowing that we are providing the highest accuracy data and genomic enhanced EPDs available and with parent verification - that every animal is EXACTLY WHAT WE SAY THEY ARE!

Today's genomics can add as much value to an individual's EPD accuracy as a bull's entire calf crop for the year, or even more impactful - the complete lifetime production of a cow. Check out the chart here to see the impact genomics provide for each given trait.

TRAIT	PROGENY	TRAIT	PROGENY
Calving Ease	15	Stayability	25
Maternal Calving Ease	3	Carcass Weight	6
Birth Weight	21	Marbling	8
Weaning Weight	22	Ribeye Area	5
Yearling Weight	24	Back Fat	6
Milk	18	Docility	19

All of the bulls in this year's sale have had complete genetic testing and all results are published in this catalog. Every bull will have the most up to date and accurate genomic enhanced EPDs available, all bulls will be identified for homozygosity for both color and polled and all bulls sell free of all known genetic defects. All of this is in addition to the standard performance testing, ultrasound for carcass traits, pre-sale breeding soundness exam, and the Trinity Farms stamp of approval that you have come to know and trust.

TFS Samurai 7362E

TFS Samurai 7362E

As the powerhouse lead off bull in the 2018 bull sale selling to Werning Simmental in South Dakota, he has continued to claim a unique position representing the 0056K cow family here in outstanding fashion. His sons are thick, deep, full of muscle and just about as soggy as you can make them and he is destined to leave a set of replacements that will do all of the things that great cows need to do so well! His phenomenal dam is still in production and has many 1/2 brothers to Samurai selling in this event.

What does homozygosity mean to me?

We have identified all of the bulls as well as the females for their homozygous status for both horned/polled and black color in addition to parentage confirmation and GGP-100k genomic testing. Bulls that are homozygous polled will genetically dehorn your calves when bred to horned cows. The bulls that we have identified as homozygous black will sire all black calves just like a purebred Angus bull does. Although the genetics remain the same, some folks don't want to insert the red gene in their cow herd, we understand and respect this, and have gone to the effort to identify all of the sale lots that we can for this reason.

Service Before the Sale

Don't worry we are going to provide unequalled service after the sale too, but consider these benefits of making your bull purchases at Trinity Farms:

Large selection of bulls, especially Age Advantaged bulls! No left overs here, these bulls are bred specifically for this event and offer extra value and are ready for heavy duty service.

Genomically tested and parent verified – they are always who we say they are so you KNOW that you are getting what you are buying.

3rd party verification to simplify your selection process, see page 9 to learn more about Right Choice and make the right choice today by sourcing your bulls at Trinity Farms.

Complete Breeding Soundness exam (semen test) prior to the sale, KNOW that the bulls you buy are qualified to do the job you are hiring them for!

Unique programs for the industry we are in include the long running Ranchers Rebate Program, the Payment Deferral Plan (PDP), and Bakers Dozen Incentive. Do business where your business matters!

Comprehensive Health. We recognize the investment everyone makes at all levels of the industry and provide a thorough and comprehensive health program to help protect your investment.

Phenotypic Certification – if you're not going to like them, we don't like them! The bulls have been rigorously sorted for the entire development process to ensure that you have access to the best available on sale day!

TFS Arnold 0840H

As a standout since birth, Arnold continues to sire one of the most exciting groups of calves each year. Arguably one of the best sons of Black Powder from a long list of successful sons, he easily has risen to the top. From an exceptional line of females, he makes them as fancy as they come and loaded with muscle. His sons are the perfect compliment for a plainer set of black cows that need some punch and eye appeal.

S A V Rainfall 6846

Rainfall was the \$460,000 sensation from the 2017 SAV sale and has been a major headliner at Select Sires since his enrollment and is among the Angus breed leaders for registrations each year. As our choice for a Charlo replacement, he sires an outstanding set of calves each year regardless of sex or breed percentage and his sons are in high demand. He adds extra length of spine without sacrificing actual thickness, muscle and body capacity. He sired the Lot 1 bull TFS Monsoon from the 2022 sale and has a great set of sons on offer.

*Out of a really nice Powder River 1st calf heifer

Square B True North 8052

Selected for mating the heifers in our fall AI program, he has produced an exciting set of calves that are quite impressive in their total makeup with more performance and muscle than one would expect from a calving ease bull. Patterned similarly to the Rainfall sons we expect this group to be popular with cattlemen looking to add length and muscle to a calf crop while keeping body stature under control.

*One of 5 full brothers from the fantastic 3001A Exotic donor cow

*Maternal brothers to Monsoon, Tuff, & Horizon all of whom have been used heavily in our aggressive AI program

TFS Exotic 3001A

The phenomenal powerhouse dam to the lead off bulls from the last 2 bull sales She has exciting transplant calves by Tehama Patriarch and Bold Ruler in addition to being the Granddam to the lead off transplant Bold Ruler sons from TFS Kalidescope! She is also the dam of TFS Horizon, a top heifer bull prospect selected by Wendall & Penny Black from Prairie City, Ore from the 2021 sale that has worked immensely well in our AI program with sons on offer in this event. We are incredibly excited to see her influence grow in recent years as she was enrolled into our transplant program after rising to the top while recording 8@104 for WW, 7@104 for YW, 4@109 for IMF, & 4@103 for REA. Truly superior females like her have been the driving force behind Trinity Farms and we proudly share her production

Payment Deferral Plan (PDP)

Once again Trinity Farms is offering another industry 1st in our market area. This year we are offering a payment deferral plan that allows for you to pay for 50% of your bull purchases on sale day with the balance due by November 15th 2024.

Be sure to visit with Mike, Robb, or Chelse to learn more and see how your purchases can qualify.

Plan requirements:

A minimum purchase of 3 bulls and or an aggregate purchase amount of \$12,000 or more.

3-5 bulls will require a note @ 10% interest

6-10 bulls will require a note @ 8% interest

11 or more bulls will require a note @ 5% interest

50% initial payment required on sale day

Balance due in full by November 15th 2024

A note with a personal guarantee will need to be signed on sale day

A Notary will be on hand to document each transaction

This offer may be eligible to use in conjunction with the BDI Plan and Ranchers Rebate Program as well.

Visit with Mike, Robb, or Chelse to see if your purchases qualify.

KBHR Bold Ruler

Do not miss this sire group in this year's offering! We rarely use a Purebred Simmental bull in our AI lineup but are immensely satisfied with the overwhelming quality in this sire group. Added in an effort to boost performance and muscle, he has also excelled in creating some of the highest valued Genomic based bulls with all of his sons qualifying as G+ bulls on the Right Choice platform. Simmental enthusiasts will certainly appreciate the value that these bulls represent in a moderated purebred package.

TFS Black Powder 6609D

TFS Black Powder 6609D

As a past high selling bull himself, there is no doubt that TFS Black Powder has earned an envious position in the recent history of Trinity Farms. Each year the overwhelming quality of his calf crop contributes to incredible demand for his sons with many of the high selling bulls being sired by him each year. Backed by the very best of SimAngus females ever bred here, he is a well proven sire of exceptional type, muscle dimension and actual Ribeye with more consistency than any bull we have ever used. These sons have been in high demand in years past and he is well represented with multiple sons and grandsons selling in this event.

Bakers Dozen Incentive (BDI)

In appreciation for those of you who make volume purchases we are offering a free bull for every 12 that you purchase. Just like the best baked goods, it's always nice to have just one more bull from Trinity Farms.

Incentive requirements:

Requires the purchase of 12 bulls in the 2024 bull sale.

For every 12 bulls purchased, 1 extra bull may be selected from the private treaty bulls at no charge.

This offer may be eligible to use in conjunction with the PDP Plan and Ranchers Rebate Program as well.

Visit with Mike, Robb, or Chelse to see if your purchases qualify.

7 Steps to Ensure yo

1. Plan for the future

One thing is for certain - the next generation is going to have to do things very differently to be successful. Develop a comprehensive plan for tomorrow and be sure that your seedstock provider, just like your other business partners, has a solid plan to help you achieve success.

2. Crossbreeding is key!

Just 1 simple management decision can have a more profound impact than everything else put together...just come to Trinity Farms to select your bulls. No extra inputs, no need for a different marketing plan, no extra labor, no additional resources - add up to 25% return by putting thoughtful crossbreeding to work at your ranch - visit our "Why Crossbreed?" page of the website to see how.

3. Choose the road to success

Like it or not, you are traveling the same road as your seedstock provider. If you raise your own replacements (without outside female genetic influence) in just 3 generations 87% of your current cowherd is represented from your recent bull purchases. Be sure to align yourself with someone who has not only your interests at heart, but those of the entire beef industry as well. After all, we are all in this together!

4. Let your seedstock provider work for you

Let us fuss over all the details so you can just come pick the kind you like! We offer Angus and SimAngus™ bulls that are bred to calve easily, grow like a bad weed, and add real and distinct end point market value. And the best benefit - a set of females that'll be the envy of all the neighbors. Buy your bulls with confidence knowing they have been put through our 10 point certification program which includes:

- Comprehensive health program
- Complete breeding soundness exam
- DNA parent-verification
- Genomic enhanced EPDs
- Homozygous status for black and polled
- 100% AI sired
- Thorough performance testing
- Ultrasound for carcass traits
- Temperament approval
- Phenotypic certification

ur Legacy Lives On...

5. Insist on superior customer service

You can buy your bulls anywhere - but what level of service are you getting? At Trinity Farms our decisions are all made with you, our valued customer in mind. We offer the industry's best guarantee, a unique Rancher Rebate program, the Cattleman's Gathering in October to bring an educational and networking opportunity to you, as well as so many other initiatives to help you be more successful.

6. Protect your investment!

Never buy a bull that the seller will not stand behind and guarantee! We offer the best guarantee in the business- sound too good to be true? Be sure to check out our complete guarantee at www.trinityfarms.info

7. TURBOCHARGE your bull battery this year!

Bulls from a world class seedstock nursery that have the ability to add significant direct, and even more importantly, maternal heterosis to your cowherd are available in volume. Visit our website at www.trinityfarms.info to learn more!

Details Matter!!

How good is the warranty/guarantee that you are receiving? Trinity Farms offers up to a 3 year guarantee on feet! That's more than 1000 days longer than what you may receive from many of our competitors! Do details matter? You better believe it – now more than ever. Source your bulls at Trinity Farms, the Northwest's #1 source for high value SimAngus genetics. Let us worry about the details so you don't have to.

TFS Medicine Man 1444J

TFS Medicine Man 1444J

Medicine Man was one of the high selling bulls in the history of Trinity Farms a couple of years ago from the same family that has produced so many great sons, many of whom have landed in other Seedstock operations across the country. Used as a Stellar component with more Simmental influence in an effort not to overly dilute that component in our hybrid efforts, he has an exciting and attractive set of bulls on offer.

No Bullshit!

Mom always told you that honesty is the best policy, but unfortunately in today's world some people have forgotten that simple lesson. Do business with people you can trust – there is never a good enough deal to compensate for low character! We appreciate your business and will continue to work hard to earn your trust. Just remember, it is always more important who you choose to do business with than the business you do!

TFS Raptor 9788G

TFS Raptor has sired 2 extremely valuable and high-quality calf crops with exceptional Genomic value, added carcass opportunity all backed by one of the highest influence SimAngus females in the history of Trinity Farms. As a past high selling bull, he comes from the phenomenal dam to TFS Black Powder, with a royally bred maternal pedigree that supports his unique ability to not only sire the fantastic set of sons represented here, but also an incredible set of replacement heifers. With the overwhelming success of his 1/2 brother TFS Black Powder, we expect just as much success with these sons and daughters as they enter production.

*The 1/4 blood bulls like these end up being some of the most sought-after percentage groups each year

Yearling Bull Development – Continued Care for Your Bulls

It is so much easier to do a job well when you have the right tools! I really must compliment Dad on helping this particular vision become reality. Our development lot has been very well thought out and designed to develop bulls to have lasting value for you! Oversized pens allow for plenty of exercise and free flowing water and covered feed storage help contribute to overall health and thriftiness of the cattle.

Well-designed facilities contribute to quiet handling on horseback as well as on foot to contribute to ease of handling for you.

In an effort to ensure longevity in the bulls, we truly "develop" the bulls rather than push them for maximum gain. Targeted weight gain is from 3.0 lbs/day to 3.5 lbs/day. All of the bulls are fed an identical, high roughage ration to fully develop rumen ability and express genetic potential. We rarely need to pull cattle for treatment and feel that you are able to view the bulls in a much more realistic condition than can be found at many other bull sales. We are committed to always providing the best possible product to you for the long haul, not just on sale day.

It is our recommendation that you continue to develop these young bulls until turn out, and then restrict them to a defined breeding season at the end of which you gather them and continue to care for them separate from the rest of the bull battery. You are making an investment in the future and a little extra care until these bulls reach 2 years old will contribute greatly to their overall productivity.

We would like to suggest the following:

Feed: Remember that these young bulls are still developing and maturing. Be sure to feed them well. Good quality hay, 5 pounds of grain along with about a pound of protein supplement from delivery until turn out should do quite well.

Breeding Season and Recommended Number of Cows:

Close observation to be sure your bull is actively servicing females is wise. We suggest limiting the breeding season to 45-60 days for these young bulls for the first year and recommend the following coverage rate based on average non-irrigated pastures.

Bull's Age	Number of Females	Bull's Age	Number of Females
12 to 15 months	10-12	18 to 24 months	18-25
15 to 18 months	12-18	24 months & older	25-35

Management:

A well fenced pasture or paddock is a must, especially after the breeding season. Shelter is recommended and bedding is wise when temperatures fall much below freezing. Plenty of clean water and minerals should be available free choice. Treat as needed for internal and external parasites and be sure to include your bulls in a complete vaccination program. An annual breeding soundness exam is a must to determine breeding ability prior to the breeding season – we recommend you do this well in advance of the bull sale season to allow for plenty of selection to replace bulls as needed.

*We have been using 4 other full brothers to Patriot as well – these bulls are bred to be great

TFS Black Moon 0210

As one of the greatest females to ever reside at Trinity Farms and the unrivaled dam of TFS Black Powder, TFS Raptor, TFS Dozer, TFS Obsidian, TFS Patriot, TFS Redhill 1785 and so many others, she is the perfect representation of what Americanized Simmental influenced genetics are today! With her outstanding maternally based Legacy free pedigree, she is uniquely positioned to create an industry wide influence in addition to her growing prominence here at the ranch. Still productive at 14 years of age, she continues to raise as stout a calf as the younger cows can get done. Simm enthusiasts be sure to closely evaluate her influence offered this year as they deliver unique opportunity within the beef industry today.

TFS Patriot 1764J

Sired by the outcross sire Redhill 672X, he is one of 5 full brothers we have injected into our AI efforts here at the ranch. Bred to be maternally superior from one of the all-time most successful cow families in the history of Trinity Farms, Patriot and his full brothers also add an improved carcass opportunity in a very functional, beef bull package.

*She claims 0210 as her 2nd dam – the phenomenal dam to so many greats including TFS Black Powder, TFS Raptor, TFS Dozer, TFS Obsidian and so many other high selling bulls *We rarely offer a female out of this line, be sure to take advantage

Rancher Rebate Program

Our Rancher Rebate was created as a way to say thank you for your business. When we first put this plan together, we wanted to have a program that was inclusive for all our bull buyers. Just like so many of the practices and programs at Trinity Farms, we wanted something unique to offer our valuable business partners. Thank you for your business - it means a lot to us! We look forward to seeing you here in March!

Standard Bull Chit

For every bull that you buy for \$5,500 or more, receive a rebate for \$150 per bull

4x4 Bull Chit

Requires the purchase of 4 or more bulls - for every bull you buy for \$5,500 or more, receive a rebate for \$300 per bull. For those bulls selling for less than \$5,500, receive a rebate for \$150 per bull

Rebate will be issued following final sale settlement in the form of a credit eligible to be used on future purchases in our Annual Bull Sale, Fall Female Sale or private treaty purchases.

Over \$273,000 in customer rebates to date!
